WORK EXPERIENCE

Amhara Bank Head office — MIS

January 2023 - present

Supported the development of scalable data pipelines using Apache NiFi, Spark, and Iceberg to process large datasets efficiently.

Designed ETL workflows and data transformations using tools like Nifi..

Wrote and optimized SQL queries for data analysis, reporting, and integration.

Familiar with Python and SQL , with hands-on experience in big data technologies like Hive and Hadoop.

Developed interactive Superset dashboards for reporting purposes.

Eager to expand knowledge in CI/CD tools and advanced data engineering practices.

Hagbes — Software Engineer

August 2023 - December 2023

Collaborated with other developers to integrate multiple system through API

Developed and implemented software solutions utilizing Agile methodology, JS, React Js and Node Js

EDUCATION

Haramaya University, Bachelor in Computer Science.

2019-2023 GC with CGPA 3.54

PROJECTS

Banking Customer Analysis. Developed interactive Power BI dashboards to analyze banking customer behavior,

PropertyPulse. Secure rental web app, using Next js and MongoDB.

Data Lakehouse. Built from scratch using Apache nifi, minio, spark ,iceberg and superset

STACK

Proficient: next.js, PHP, SQL, MERN, MySQL, powerBI, Git,

Familiar: python,

CERTIFICATE

[Udacity] september(2024)
